

MB Quart QM200.3 BMW

At MB Quart "vehicle-specific systems" is of strategic importance. In the meantime, there is a significant range for BMW and others in development.

MB Quart joined the American company Maxxsonics USA in 2005, and the Americans have, of course, expanded all categories of business so that MB Quart can become more mainstream than in the past. There are things that would not have been possible with the good old Obrigheim team. A significant proportion of this is the German and European sales and design for one thing. So it's no wonder that such great manufacturers like BMW and VW were first to be considered in the vehicle-specific systems.

In addition to the "usual" front speaker system with subwoofer and crossovers offered in the USA, MB Quart offers rear speaker kits with customized active subwoofer for BMW, VW and Peugeot in Europe that snugly tuck into the body fenders, thanks to GRP body kit.

For BMW there are three speaker systems. Currently available in the USA is the QM200.3BMW. A three-way system that is recommended by the MB Quart for the 1-Series, 3-Series, 5-Series and X1. The system comes with a 20.3cm subwoofers for the BMW sub-seat body, a 10cm mid-range for the door and a 25dome tweeter.

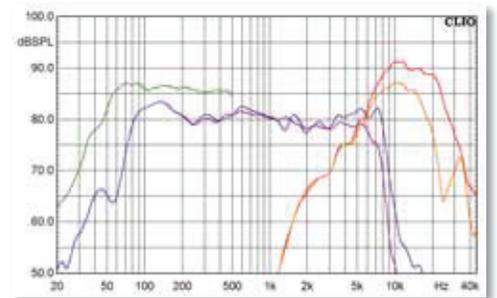

The frequency response of systems are ok, the midrange is even with extremely wide-bandwidth and balanced - a positive vibe of good-natured resonance behavior of the polymer membrane.

Sonically, I like the QM200.3 with its pretty balanced sound quality. After downloading specs for the tweeter it fits well into the overall sound and delights the ear with very neat and crisp details. Even the sturdy deep-bass knows how to satisfy. There's only criticism for the lack of bite, the MB Quart is a pleasant companion on long-haul and definitely more than a significant improvement over the original.

MB Quart legt eine konventionelle Zweiwegeweiche (mit Kabelsatz) bei. Gefiltert werden Hochtöner und Mitteltöner (Tiefpass zum Hochtöner)

Der zu laute Hochtöner kann per Schalter eingefangen werden, ansonsten recht ausgeglichener Verlauf, allerdings mit schwachem Wirkungsgrad im Mittelton
